

FOR IMMEDIATE RELEASE

Murphy Candler, Nancy Creek water study underway

Brookhaven, GA, April 27, 2015 – The City of Brookhaven has recently engaged Sustainable Water Planning & Engineering (SWP&E) to develop a Watershed Plan for the Murphy Candler - Nancy Creek watershed. This study will assist the City in securing grant funds for the projects, programs and policies that are identified in the Plan to improve watershed health and minimize flooding.

As part of this project, SWP&E will have professionals working in various areas of the City during the next few months. They will primarily be walking in and along the streams and looking at waterbodies throughout the Nancy Creek watershed.

We request that you offer your support to these professionals during this project.

For more information or any questions regarding this project, please contact Bennett White, Public Works Director, at 404-637-0576.

Thank you in advance for your cooperation!
